

I am a listener of a national radio service, that provides a content and format that is unique to this community and to other communities as well. Because the national service is possible, I am able to tune into this service in various communities across the country. I am concerned that LPFM will force such services off the air until a free XM-type service is available, depriving the U.S. public of live national radio coverage. As a matter of I learned of the events in New York on 9/11/01 through this service and know that other listeners across the learned of those tragic events as well. Lets keep the national radio service!
